July 2025

About Us

○ ○ ○ ○

**You dream it,
we build it.**

Introduction

Prakarsa (PT Prakarsa Mahakarya Abadi) is an engineering firm based in Yogyakarta, Indonesia that provides civil engineering consulting and construction services.

Initially founded as CERTC (Civil Engineering Research and Training Center) for developing skills of civil engineering students in Yogyakarta under the guidance of Joko Sumiyanto, CERTC has grown into a capable and highly-competent engineering firm. Over the past 10 years, we have executed numerous projects ranging from buildings, bridges, roads, docks, and other civil structures.

As of 2021, CERTC has been legalized (AHU-0041435.AH.01.01.Tahun 2021) and rebranded as **Prakarsa**.

Vision & Mission

Vision

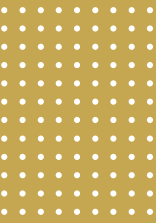

We believe that our purpose in this life is to play our role in making the world a better place. Our goal is to contribute and do our part to bettering society, through innovative, efficient, and sustainable engineering.

Mission

Innovation, efficiency and sustainability are the core principles of engineering. We will work tirelessly to ensure our designs and our products implement these principles to provide value - for our clients, for society, and for the environment. We aim to be highly capable and trustworthy professionals who understand how to implement these principles to the needs of our clients.

Our Services

Engineering consulting

We offer civil engineering consulting services ranging from **feasibility studies, financing, planning, basic design, detailed-design, project management, supervision, research, and functional worthiness assessments**. Our technical team has over 30 years of experience, with a specialized expertise in structural engineering. We have worked on wide range of projects, including buildings, bridges, roads, and docks.

Construction

In addition to consulting, we are more than capable of executing **small to medium scale construction** projects. Over the past 10 years, we have been entrusted with projects that includes offices, hotels, medium-sized housing areas, and bespoke residential properties. We operate our own metal and timber workshop along with owning small scale machinery and equipment.

Technical Team

Joko Sumiyanto

Founder | Director of Engineering

Expertise	Structural engineering, forensic engineering, construction supervision, concrete materials
Experience	33 years
Education	Bachelor's Universitas Gadjah Mada Master's Universitas Gadjah Mada (cum laude)
Certification	SKK Utama - Ahli Teknik Bangunan Gedung, Ahli Teknik Jembatan SKA Madya - Ahli Manajemen Proyek, Ahli Teknik Jalan
Professional association	Persatuan Insinyur Indonesia (PII) Pengurus PII Wilayah D.I. Yogyakarta, Head of Division - Engineering Talent

Kemal Fardianto

Engineer | Director of Operations & Business Development

Expertise	Transportation engineering, planning, & financing Engineering economics
Experience	6 years
Education	Bachelor's Universitas Gadjah Mada Master's University College London (cum laude)

Gatra Dewa Oktananda

Engineer | Head of Research & Development

Expertise	Structural engineering, construction engineering & supervision, concrete materials, project logistics & planning
Experience	6 years
Education	Bachelor's Universitas Gadjah Mada Master's Universitas Gadjah Mada

Technical Team

Mochammad Murtadlo Najib

Engineer | Head of Construction

Expertise Construction engineering & supervision, project management, logistics, & supervision, cost estimator

Experience 10 years

Education Diploma III | Universitas Negeri Yogyakarta
Bachelor's | Universitas Janabadra

Arif Tri Wijayanto

Engineer | Head of Drafting

Expertise Engineering drafting, construction engineering, project management, cost estimator

Experience 10 years

Education Diploma III | Universitas Negeri Yogyakarta
Bachelor's | Universitas Janabadra

Irkhas Bayu Faveryan

Engineer | Research & Development

Expertise Structural engineering, numerical analysis & modeling, building information modeling (BIM)

Experience 6 years

Education Bachelor's | Universitas Gadjah Mada
Master's | Universitas Gadjah Mada

Support Team

Tsalitsatul Husna

Engineering Support | Administrator

Expertise Hydrologic engineering, admin
Experience 10 years
Education Diploma III | Universitas Negeri Yogyakarta
Bachelor's | Universitas Janabadra

Junior Engineers & Drafters

Komang Ari Switara

Construction engineering & supervision, logistics planning & management

Andhika Pratama

Construction engineering & supervision, drafting

Achmat Syakur Nuranto

Construction logistics & support

Ryan Muhammad Fajar

Construction logistics & support

Muhammad Luqmanul Hakim

Civil engineering & architectural drafting

Ripki Aji Permana

Civil engineering & architectural drafting

Project Delivery Partners

Fariz Rachmana Putra

Architect

I Made Sudirawan

Mechanical, Electrical, & Plumbing Engineer

Holly Bilowo

Hydrologic engineering

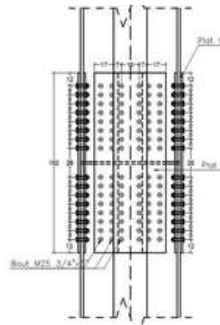

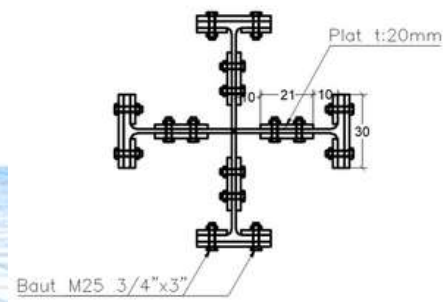

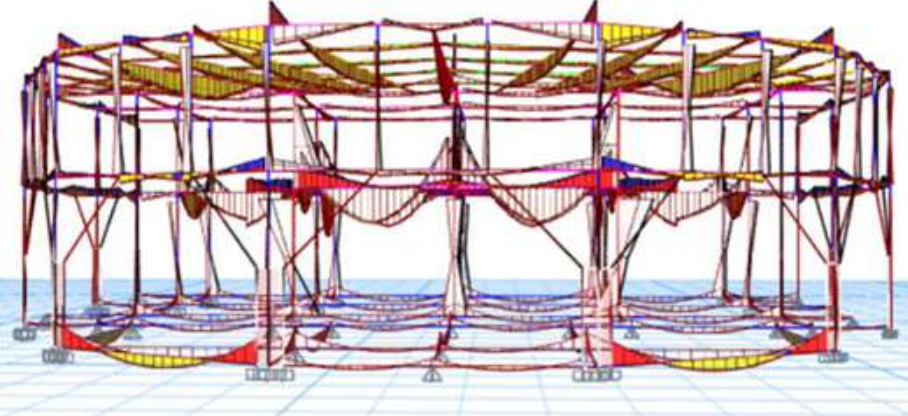

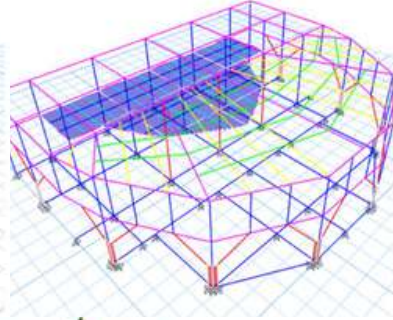

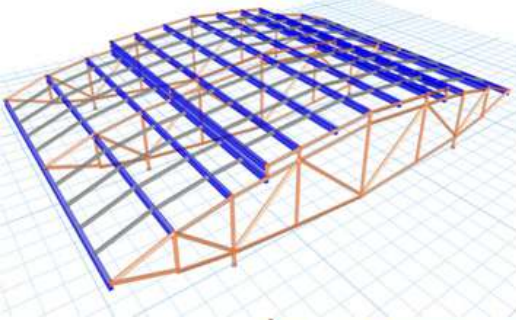

Project Portfolio

STMM - MMTC Construction
2023-2024
Yogyakarta

In the construction project of the STMM - MMTC Building (November 2023 – October 2024), Prakarsa served as a site engineer, responsible for managing work schedules, ensuring smooth construction progress, conducting daily evaluations, and preparing both shop drawings and as-built drawings.

Railway Station Infrastructure Structure Design

2023 – 2024

Jakarta

Prakarsa is an experienced structural engineering consultant specializing in building design, including strategic projects such as the new building development at Tanah Abang Station, Jakarta. From October 2023 to March 2024, Prakarsa was entrusted with the structural planning, which included structural calculations based on the architectural design and the preparation of efficient and economical Detailed Engineering Design (DED) drawings for both the superstructure and substructure.
